## **Dynamik Foal Purchase Package**

At Dynamik Stallions we pride ourselves on producing absolute top international quality pony foals. We bring to you a selection of Germany's very best imported stallions with top performance records and stallions that are proven producers of quality progeny in Germany before their import to Australia.

We put a lot of time and effort into raising our foals and ensure that the foals are extremely well handled. We believe that if you invest the time into your foal with professional handling that this makes things very easy and straight forward as they head into their "teenage" years. Our broodmares are all proven and are assessed to be worthy of being listed as Studbook mares for Westphalia, Germany.

### **The price of our foals includes the following deal :**

Payment can be in full or a deposit of around 25 percent of the full purchase price is payable by the purchaser upon signing our sales contract. The remainder of the purchase price can be paid off until the foal is around 6 months or close to weaning.

### **Dynamik Stallions will cover the following :**

- All foals have their IgG tested around 24 hours after birth by Baldivis Vets with results provided to the purchaser. IgG results are required to take foal insurance.
- An AVA vet check can be performed as part of the sales price.
- DNA and colour testing is done where applicable.
- The foal will be microchipped.
- For colt foals, the cost of gelding will be covered, and this will be performed around 5 months of age.
- All foals will be registered with the ACE Group or Westfalen Verband, Germany.
- Foals will be plaited and prepared for the ACE Assessment tour with an FN assessor with the Westfalen Verband. Details can be discussed with the purchaser.
- At least one professional photo shoot of photos will be provided to the purchaser of the foal.
- Regular hoof trimming will be performed as required with particular and regular assessment of the legs and hooves as the foals are growing and developing.
- Regular worming and tetanus/strangles vaccination will be covered.
- Broodmares with foals at foot also have a strict FEC and deworming regime.
- Foals are checked and treated by our chiropractic specialist vet at around 2 weeks of age as well as prior to weaning and more if required. This ensures that they grow with perfect body alignment.
- All paddocks and stables are cleaned including our large socialisation paddocks.

- Once foals are strong enough in the weeks after being born they are brought into individual small paddocks with large 7 x 4 meter stables that include fans. At night they are out in larger reticulated paddocks to play and exercise when the weather is cooler. All stables are fitted with camera systems to provide some vision during the day and night. Double paddock shelters and shade trees also offer extra protection in the larger paddocks.
- Top quality fencing is provided with mesh and Stallion Rail and electric top rail.
- During hot weather foals are hosed down which is a great way to add extra handling as well as providing extra care.
- Foals are regularly handled including learning to lead, bathing and having sessions in our custom foal bays to learn about being confined in a safe manner. They are groomed and brushed with sprays and hoof grease applications. The foals go on walks around our tracks and sheds with their mothers once they have established leading skills. They are taught how to float load. Everything is covered in a safe way so that after weaning they can spend time to develop and socialise and play but the hard work is all covered and then they are easy anytime they need to come in to be handled during their teenage years.
- Diet is of the utmost importance to raising our Dynamik bred foals with top quality meadow and lucerne hay always provided. A balanced diet of HYGAIN feed products and roughage products are provided with every day.

Dynamik Stallions also offer a raising service at our 28 hectare property. The paddocks are between 1.5 – 2 hectares each and are all fully reticulated. Each paddock has a 6 x 6 meter paddock shelter as well as shade trees. All spelling paddocks are mesh fenced with Shockcoate electric top rail and top quality safe mesh gates. Our huge spelling paddocks are well maintained, the manure is cleaned by a machine regularly and they are slashed and rotated as required.

Only Dynamik bred foals are raised by us and it is a wonderful opportunity to have your foal raised with their foal friends of the same year group. A very reasonable fee is offered to the purchasers of our foals only, including daily hard feeds, hay and at least twice daily checks. Regular handling with farrier trims and “makeover days” every few months are included. We feel it is extremely important that foals have a lot of room to run and play, to socialise and develop their bones and ligaments.

We can even prepare your pony at 3 years old with a first prep for starting under saddle and prepare them for their travel to the eastern states or locally in WA.
