Frame overo/lethal white syndrome	n n	Negative for OLWS/frame overo
Grey	n n	Negative for grey
Lp/Appaloosa/night blindness	n n	Negative for Lp
* PATN1 coat pattern modifier	n n	Negative for PATN1
* Roan marker	n n	Negative for roan marker
Sabino 1	n n	Negative for sabino 1
Splashed white 1/deafness	n n	Negative for splashed white 1
Tobiano	n n	Negative for tobiano
W20 white markings	n n	Negative for W20

\* These tests are marker tests. We classify a test as being a marker when it does not cause that trait, but is statistically associated with it. This means that in a minority of cases an animal can test negative but still have the trait, or conversely test positive but still lack the trait. Some tests are classified as markers because environmental triggers are required to make the trait apparent.

### DNA TEST RESULTS

ISAG institutional member no. 129553

#### Owner/contact:

Mrs Kristy Jarvis
